“ I like the AJAX format betetr, but the classic Joomla one is not bad. The controls need to be more nicely organized for people who are not familiar with managing lists and spreadsheets. The action of Add a New Obituary needs a really prominent button, and more instructive text with hover text instructions would be good too.Do you plan to make front end management of obituaries available to Joomla 1.5 as well, or just 2.5? I need this ability for a client's site.
