“ *Paula and I met about six years ago and became friends. I lived only two doors down so it was easy for us to get together and take off for an afternoon. There was always eating involved and shopping. I always rode with her as she had the big scooter loaded on the back that I called her Cadillac. We really done nothing anyone else would call exciting but we loved to be together. On many of our shopping trips she said to me, think I will get a side car on this Caddy and then we both can ride.*

When we shopped she rode on the scooter and I could never find her . I said I am getting you a flag so at least I can find you by hunting the flag. She never forgot thee flag and ask about it. All she said was flag and I knew what she was thinking . Special It had to be so I made it. Bright orange material with sparkles on it and the name SPEEDY in glitter. It had to go on the foot of her bed and there it stayed as she passed through The Gates of Heaven. I will miss my scooter friend but I know I will be able to find her when I arrive. Love you Paula
