“ *I knew SK way back in the early 2000s, and I cannot fully put into words the profound and withstanding impact he had on my life. He was the most important person in my life during that time and truly lifted me up during the darkest days of my life. I have always regretted that we lost touch, and now always will. Sarkis was and continues to be, an incredibly significant person to me.*

*Every few years, I have Google'd SK but have been too awkward ever to reach out. I mean c'mon, it'd been 13 years or so. What would I say?*

*I am heartsick to learn of his passing over 4 years after the fact. I wish I knew the circumstances. He was such a pure, sensitive light in a world he was too good for. He deserved better than to die at 32.*

*Anyway, to whoever is reading this, know that your Sarkis made a tremendous impact on at least one person (I'm sure more), and I carry his memory in my heart always.*

DL

“ Sarkis was a member of the New York Training Crew. We were weekend parking lot strongman heroes who enjoyed the highest level of camaraderie. It was an honor for me to share “The Lot” with Sarkis. He was a great man and had tremendous individual spirit. Rest in peace brother.

“ Sarkis was a brilliant young man and one of the best people I have ever known. I am deeply saddened to hear just today of this tragic news. The world has lost someone special who truly would have changed it for the better.

“ Sarkis worked as a software developer here at Teladoc, and made many valuable contributions to our company. He was great to work with. My deepest condolences to his family.
